Introduction

This overlooked untranslated by $200k tenured prof's

> (just what looks increasingly like mostly AI-gen. translit, so not surprising that there's no CDLI line art, yet for an EDIIIa tablet it's in rare pristine condition
> …and proof both CDLI & ePSD2 translit (abc…xyz sludge only) are AI-gen is the missing gudu2 𒍪 (official) shaman gudu2 (fish sumaš) 122E8 which sticks out like a dog's hind leg – a human would pick that up just like uncouth 𒍪 did, esp. if AI also gen. signs too
> …and there's only one CDLI 'Related Publication':
> Primary SF 054 Deimel P Anton '1923 Schultexte Aus Fara Wissenschaftliche…
> – that's Anton Deimel, the guy who produced the famous LAK list.
> …well, you track that publication down, then using the tablet's Museum No. VAT 12597 (kept in Vorderasiatisches Museum Berlin) eventually dig it up having been buried with lexical tablets, but alas, there's only a partial list of the signs (p47-48)
> …*and get this*, the Great Deimel, revered Sumerologist, records our P010644 backwards, and it was malevolently deliberate – just part of his sabotage op!!! 𒍪

tablet is not just about spells / incantations. It is a whole lot more than that — in fact, turns out after applying Mugsar 𒍪𒍪𒍪𒍪4−way it is the first ever recording, in writing, of 'Eden and the Snake' myth, much later plagiarized by a certain group; and of sapiens as intellectuals.

..

𒍪 The scribe *prescribes* 12 𒍪spells, as in 12🌒mo*o*n'ths of the year, recited in 3 Acts of 3/5/4 configuration:

> Act I – 3 𒍪 in the beginning the Creation Spell o.i.1
> Acr II – 5 𒍪 beginning with the Tigris o.iv.2
> Act III – 4 𒍪 beginning with Irrigation » Eden r.iii.1

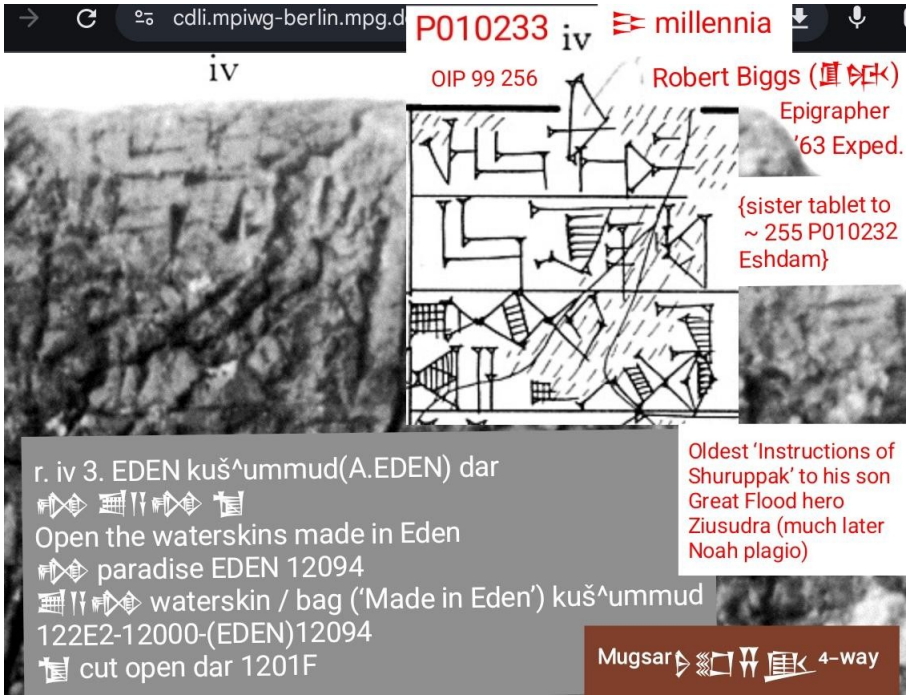
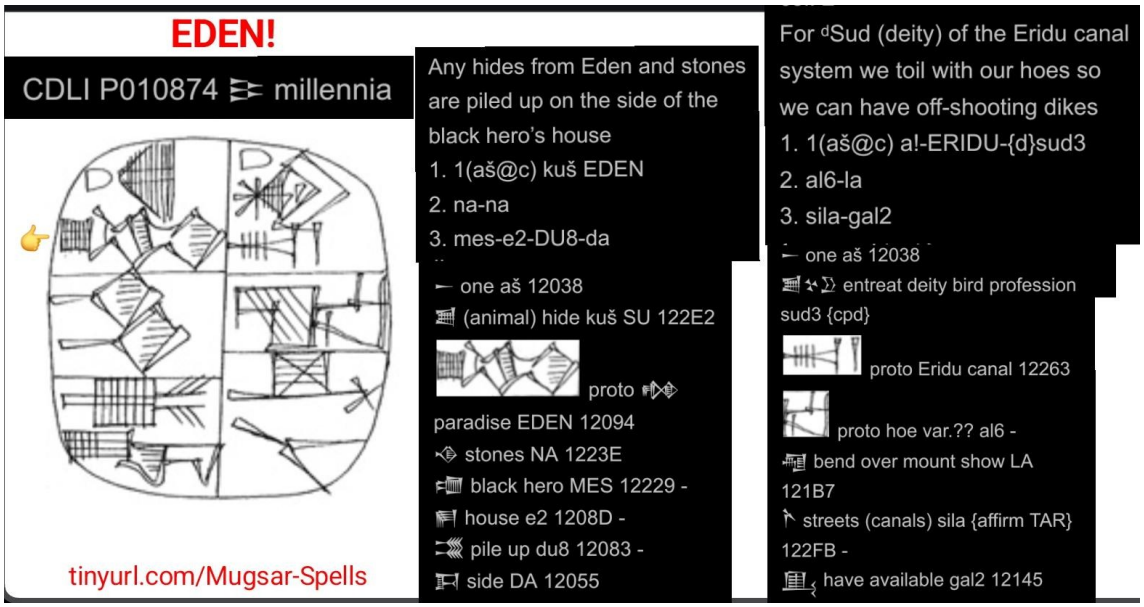
the details:



.



» Eden-Eridu Etymology

 the Eden signs, both proto and later classical, aptly appears to emphasize irrigation canal lines – the most important factor in creating a paradise.

As does  (canals and dikes off a river) the proto var. of NUN 12263 Eridu, the oldest Sumerian city with the oldest canal: the Eden-Eridu Canal (r.iv.6)

.

Christopher Woods in his Robert Biggs Retirement Tribute contribution ('04) p328 about the etymology of buranun / Euphrates (that's NUN/Eridu in the middle » o.iv.4 – Tigris) makes the case that še3 12365 is the base and in relation to gana2 field 120F7.

But Woods was going with the standard translat of še3 as rope – a river is like a rope.

Uncouth begs to diverge on this point – our P010644 is rampant with še3 being canal lines in the irrigation configuration.

Now, that pattern is thought to have been herringbone, thus

And sure enough those canal lines are in the gana2 fields. Furthermore, this slanting fits another point raised by Woods – the slanting of še3 which we can see in the middle of the proto EDEN var. used by the scribe in our tablet. More confirmation that our Eden paradise etymology is all about irrigation, just like it is for the 2 mighty rivers on either side, west-east.

toward GÁNA between the Early Dynastic and Sargonic periods.[18] Many of the values that are later attributed to "KIB," as we shall see, reflect the interwoven histories of ŠÈ and GÁNA in the third millennium.

The precise form of the graph KIB-*gunû* (*LAK*, no. 278) at Fara is uncertain, insofar as it is appropriate to analyze every complex sign as a composite of simpler graphs after the fashion of the analytical apparatus of the first- and second-millennium lexical tradition. Clearly related to ŠÈ and ŠÈ-*tenû*$_{90}$ is a "slanted" ŠÈ, (note, however, the formal differences from ŠÈ-*tenû*), which is often employed to write zíd and dabin at Fara.[19] In at least one case, KIB-*gunû* resembles the crossing of these signs, ,[20] but, more commonly, the form appears to be based on a *gunû*-form of ŠÈ-*tenû*, e.g., , .[21] Indeed it is this second shape that gives rise to the simplified allographs, which make their appearance already in the Abu Salabikh corpus, e.g., , although an allograph derived from ŠÈ-*tenû*$_{90}$, such as, , is also well attested.[22] In turn, it is this first Abu Salabikh form that is the ancestor of the KIB-*gunû* graph, , encountered at Nippur and northern Babylonia at the end of the Early Dynastic period.[23] The

 Suspicious crack / tampering in heart of Creation Spell from o.i.3 (Standard fill) to exact end o.i.6. (Eden...) where someone has put a red marker (and another one at the head of the Eden sign), doesn't seem to have actually broken off, tho' there appears to be glue in the crack esp around the foot of the Eden sign, where there's a squashed one end incongruous looking small rectangle like an attempt to slide a spatula under and lift it off the tablet, and it's suspiciously blackened, like careless dirty finger smudges – forensics anyone?!

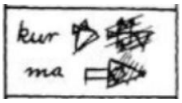
The Eden sign is the most (deliberately) damaged / defaced (serendipitously the scribe put another one in r.iii.5 which is perfectly preserved) ...it's like somebody

tried to remove the guts of the opening spell but got caught in the midst, or dropped dead because of scribes standard colophon 𒀀𒀀𒀀𒀀:

…or could it have been Anton Deimel, himself (that sabotaged the Eden Creation Spell) he worked for the Pontifical Institute in Rome

…for the Eden frame he just happens to hatch out the ‘create’ signs in the bot.R.cnr indicating nothing at all is visible (𒅗 gen7 is one of the most ubiquitous signs on the tablet, and he doesn't miss it on other frames, indeed, on some it's one of the few signs he draws in):

o.i.6 cf. r.iv.10



ex. draws in signs even if damaged (r.iv.9)

…not to mention that he thinks better of recording KA 𒅗 + ME 𒈨 knowing it would then indicate 𒂊 EME language, making the frame’s intent even more clear and impactful, so he wilfully crosses it out and stupidly leaves the telltale ‘+’ sign, IAE, we can see it above KA in all its glory, perfectly preserved:

cf. he doesn't have a problem with recording LI above KA turning it into tu6 spell

(closing alt.) ex. o.v.5 & r.iv.7

...did he also deliberately record a partial line art / translit backwards???

(Original B&W photo possibly taken by Deimel puts rev. on top)

.

INT MUSEUM DAY

Anton Deimel is examining VAT 12597 in the Vorderasiatisches Museum Berlin in the early '1920s – he immediately spots the EDEN and CREATE signs at the beginning of the tablet.

This is exactly what he was trained at the Pontifical Institute in Rome to watch out for.

CLOSEUP of a 'then' still pretty well-preserved EDEN CREATION frame.

First things first. We see him beginning to sketch out all the frames for his book.

He does the first 5 frames. Stops at the EDEN CREATION frame.

He screws up the note paper and chucks it in the waste basket.

He flips the tablet and begins recording backwards so that anyone perusing his book will see it's just about the work of an overseer – a mere 'Administrative' tablet. (Anyway, he will bury it in the boring lexical tablets section.)

He gets to the last column and the all-important EDEN Creation frame, we see him finish it in flurry by cross-hatching out the CREATION signs area completely.

Then we see him stop for a moment, pats his forefinger on his lips (he's not sure of something).

Abruptly, he also crosses out the ME sign, now realizing that leaving KA + ME would then indicate EME language, making the frame's intent a little too clear for comfort. (But he stupidly leaves the telltale '+' sign.)

He finishes the last frame. There. Done. He smiles smugly to himself.

Now what to do with the tablet, itself. That EDEN CREATION section. He checks to make sure no one is looking. First, with the magical spatula he carries for just such a precision operation, he defaces the EDEN sign. Then he starts a crack around that whole section and carefully lifts it up a bit , especially at the end of the EDEN sign.

If it should ever be handled again in that area, that thin shard will likely crumble to pieces.

Deimel is finished, he approaches the curator holding out the tablet.
Then just as he is about to pass it to the curator he pretends to stumble.
In SLOW MOTION we see the tablet rotate in the air.
Just as it's about to crash to the floor the curator dives and miraculously catches it.

CURATOR

(In great relief)
Few! That was close.
Just a crack opening up.
I'll put some glue in
to make sure it doesn't get worse.
I won't let such an old and well
preserved tablet out of my sight again.
Good day, Herr Deimel.

.

cf. what happened to P010769 an inferior partial copy of P010644, just happens to have the whole beginning corner neatly cut off »

.

The De-facing and The Eye of Eden

The scribe accentuated the face intent by making an 'eye' (not seen in other wedges) clearly shown in r.iii.5 and still survives in defaced o.i.6.
The face was literally the most 'de-faced' part of the Eden sign sabotage.
And the tablet is trying to tell us so » □

cf. ePSD2: gigir ab *

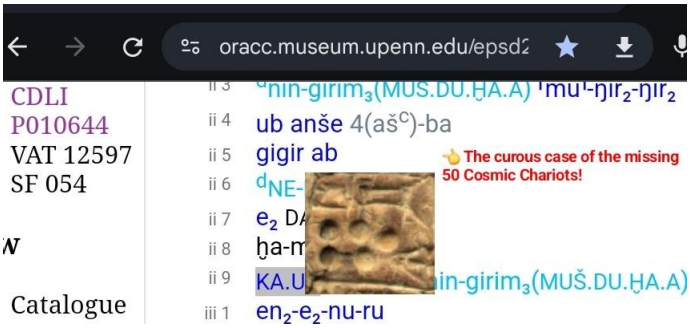
□ □ □

…our 50 cosmic chariots…

□ chariot gigir 121C0

□ 10 proto □ U 1230B {x5 = 5(u^{c}) 50 ninnu*}

*ninnu is a later label – often numbers don't have names or are hotly debated or not even attested, esp since the system is sexagesimal (60 □ geš2 12079 – the fact that the scribe records 50 suggests that was the actual total) based, and even the way they are shown in translit varies – something Steve Tinney Director of Oracc-ePSD2 is attempting to standardize » 24210r-archaic-numerals



*The curious case of the missing 50 Cosmic Chariots!?

□ Surprisingly, if not shockingly, the $200k tenured prof's (or his AI program) ePSD2 translit totally omits the 5 □ like it couldn't be seen on the tablet (check the full-view it's the most standout feature on the whole tablet like craters on the moon) or it's not relevant, or there's no obligation to try to be faithful to the intent of the scribe …who the blazers knows, inexplicable – I mean the 4 donkeys shows up in the frame directly above …what if you can't find the photo of the tablet (CDLI out of the blue transferred from UCLA to somewhere in Germany) 50 Cosmic Chariots lost forever, the beautifully rendered No. 2 What's Sacred Spell loses it's whole impact, not that the highbrows have any idea what a 'Gem of Literature' this tablet really is?!

But that being the case, it reinforces our decision to go with spatula instead of the standard scorpion in o.i.2, esp as "Cosmic Spatula" much better encapsulates the title of the opening Creation Spell (and for that matter, to deviate from standard in a lot of other frames too, and go with □□ gut feeling, cuz I swear there's been numerous times when the original scribe has been sending uncouth □ nudges from some other 11th dimension / multiverse).

And really, picturing 50 chariots is a buzz, kind of gives the whole tablet an epic feel, and the use of □ aptly alludes to wheels of a chariot.

cf. ePSD2's translit for an inferior poorly preserved partial copy of our P010644 » P010769 (CDLI photo) which does show the '50'

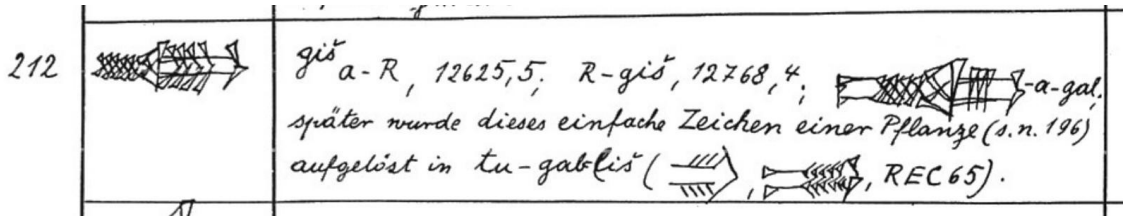
 acacia tree of life kiši17 AD2 12111-12109

 fire izi 12248
 power fuel sig10 122E7

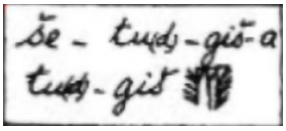
rr43 . . .

r.iv. 3. asalx(LAK212)-asalx(LAK212) a se3
/ asal₂(ASAL₂ᵃ)!-asal₂(ASAL₂ᵃ)! a sig₁₀

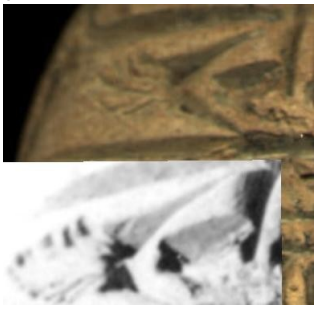
There were also poplar trees
 poplar tree asal2 12037 (both CDLI & ePSD2, but prob. AI-gen.)
 incongruously *engraving* by the scribe of 2 poplars –
that look like 2 dead bodies / *graves*
and not at all like Deimel's LAK212 i.e. his drawing of the standard proto sign,



cf. Deimel's take on this frame

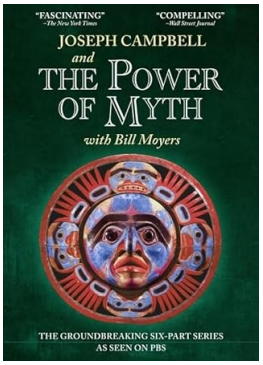


he doesn't even see his own LAK212, he sees “tu(d) - giš” which can mean shaman 12305, ex. SF 047 P010632 i.1. EDIIIa Shuruppak lexical (ePSD2 | CDLI) »



tho‘ A-tu can also mean poplar (ePSD2) ex. WF 047 P011107 EDIIIa Shuruppak Admin

– either way, it's straight after Tree of Life, and eerily 12037 ASAL2 comes straight after 12036 ARKAB2 (i.e. follows phonetically on the sign list and both are unusually long lemma / double syllables) = bat which is sometimes shown as shaman lagar 121EC — a bat that changes into a shaman that changes into a poplar …and this frame follows not long after the other var. 121EF r.ii.8 wild haired shaman-like woman (and emphasized in chorus) …and next to the bat / vampire what other creature gets a bum rap in mythology and is coming up soon in r.iv.11 … yep, you guessed it, poor old Snake » Joseph Campbell and the Power of Myth with Bill Moyers (Amazon)



JC: It’s been tough on serpents, too… ‘Who told you that you could eat that?’ They replied, ‘Snake did.’

BM: Poor Snake.

– is Snake getting ‘framed’ by the pissed-off chameleon / shaman / Girim who walks out early on the again incongruous *boomerang* (returning weapon harbinger frame » karma) demonstration in the ritual theater r.ii.3 because of the lack of decorum, and the sacrilegious behavior doesn't improve with getting drunk under the tree of life, and to emphasize the point the scribe purposely throws in the again incongruous sitting on their *asses* r.v.5?!

{“True poplars tend to thrive in wet environments like riverbanks…”}

rr44 . . .

The story within the spells yyy

Clearly, the tablet was authored by the Overseer (to OS – deserves a real name, let's bestow □ □□ Ugula Idigna), who is one of the few people that can read and write, which is required to complete the admin records {» var. RE’%} related to managing the Eden irrigation system.

Ugula Idigna first autobiography

So the OS also records the spells, which are read back to Girimmm the snake-shaman, who then affirms them.

> cf. girim (□) □ 121B8 fruit tree connotation (ePSD2) i.e. extension of chameleon theme; {TruEtym} 'grim' fierce cruel (via proto-Germanic); (gremlin /) goblin (rogue) Gk. kobalos » Lat. gobelinus

But Girim doesn't know that additional frustrations are added into the text. Basically, the OS is pissed off with what Girim stands for, wreaks havoc, a blight on the ascent of civilization – the non-productive emphasis on bogus magic and rituals.

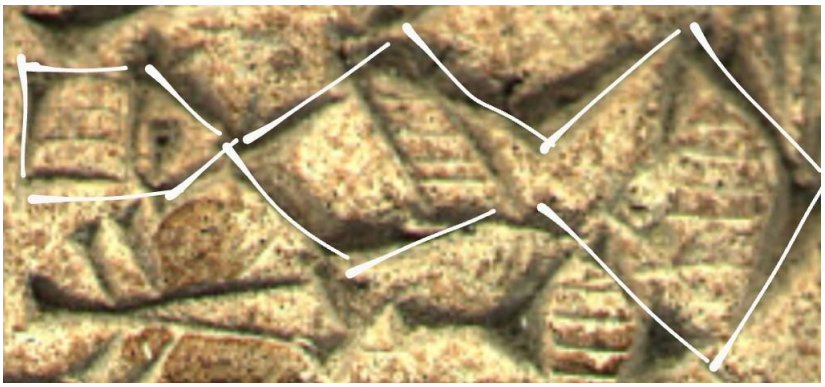
Because if there is no food production through managing irrigation and ever-threatening great floods they all starve. Hence the incongruous succinct point made in r.iv.4 regarding what it takes to be an effective civilization.

Thus food is not suddenly and magically created out of nothing as per the opening sarcastic 'spell' on creation. Girim is seen as a big part of the problem and is known well enough to see through disguises, and that the 'hair is wild all day'. And duly paints Girim as a *schizo* that will be the downfall of civilization by ultimately making people think they can get wisdom and food production from magic – drunk under the acacia tree on their *asses* □ …practicality vs paranoid schizophrenia.

Finally, the OS is proud of being able to function with double power in the face of dealing with these 2 headaches and thus the 2 main themes of the tablet, volatile irrigation / flooding and the chameleon snake shaman — to still be an effective irrigation manager and produce enough food through a successful harvest, and be a fine upstanding leader of the community, rightfully upfront of the Nesaŋ procession. Karma□ in the end our scribe / Overseer turns the tables {/ the table*t*} and puts a big spell on Girim, and the like.

Moreover, the number of times ePSD2 EDIIIa attestations indicate rare or oldest and only –

> many of the signs are □ millennia proto cuneiform, ex. Eden, the big long full frame width proto, r.iii.5



appears to be the is only clear actual ED photo, in the myth context, in existence, a little less well preserved in the opening ‘Creation Spell’ (o.i.6 with the suspicious tampering)

and indeed, this whole tablet is the oldest most faithful picture of Eden, period,

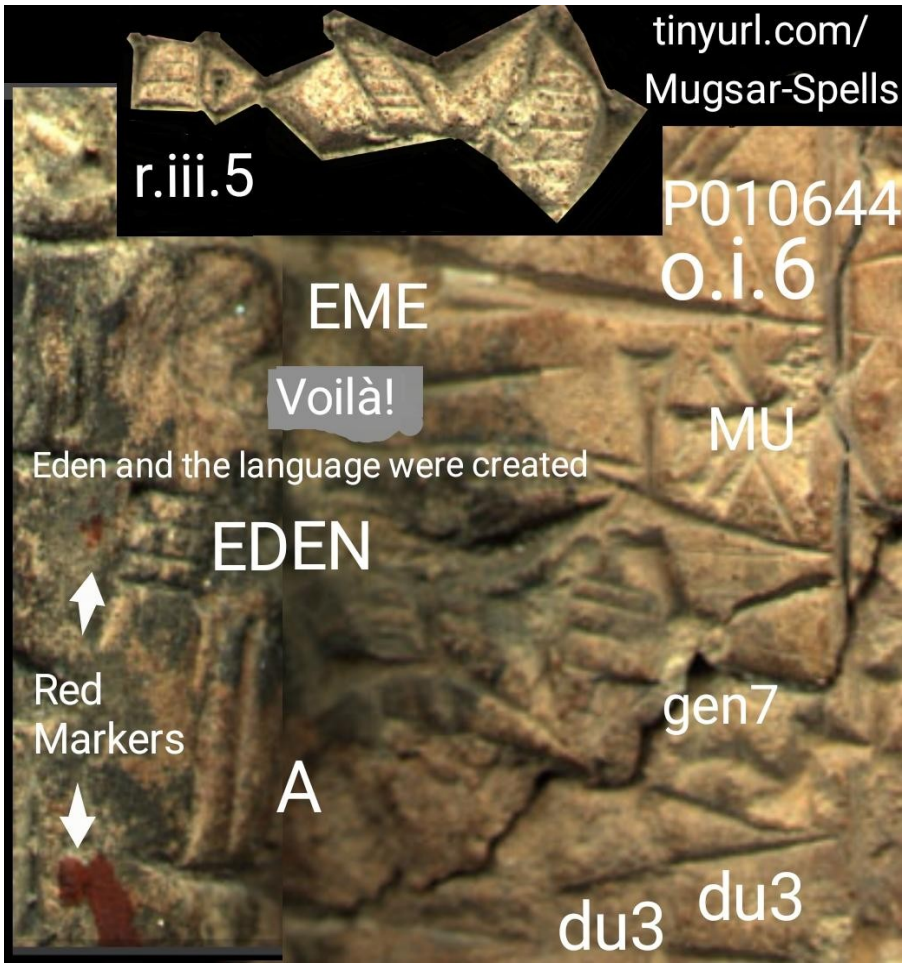
in the later classical period the sign becomes half the size probably when it was no longer a paradise, and increasingly just a flood plain between the 2 rivers

– strongly suggests that our

{previously not properly analyzed & AI categorized as merely ‘administrative, is not, nor is it lexical proverbs tribute literary, on the contrary, it's autobiography}

SF 054 P010644 is paradoxically the very first doc in the history of civilization to record all these concepts — thus rendering it very much a *secret* tablet. And the Establishment / Hollywood will no doubt keep it that way.

However, there should still be court action on behalf of the Sumerians in The Hague against the plagiarizers for pushing this myth as concrete historical fact for centuries and using it to extort money out of followers (who should also receive compensatory damages, just like the cases against big tobacco companies). They didn't even change the name Eden, which should be internationally trade marked to the plaintiff.



“*Voilà*! Eden and the language were created!”

Sumerian Grammar

Ubiquitous aux. particles / phonetic complements basically ignored here, more of a focus on the scribe's choice of signs, esp possible *double entendre*. For the pedantic class who want to get into grammar dynamics, good luck.

Then there's CVVE – you see it a lot but nobody really explains it, nor is there much in Google searches…
Compound Verb Verbal Element (no discernable independent lexical semantics) … compound verb is formed by combining a noun (often representing a body part) with a verb stem, where the verbal element is the core verb that carries the primary action, while the noun acts as a kind of "semantic object" specifying the action's focus or manner, often indicating which body part is involved in the action; essentially, the noun is incorporated into the verb to create a more specific meaning.
Ex.:
"šu du11" (lit. "hand to say" □ hand šu 122D7 □ say du11 12157) tr. » "to tend" or "to take care of" where "šu" (hand) is the incorporated noun and "du11" is the verb "to say".
□ thresh | suffix CVVE ra 1228F
Structure:
The word order of Sumerian was generally SOV (subject-object-verb)
{Japanese is very similar, and in several other respects, like a cultural reticence to have a clear hard 'yes' word to avoid commitment, and with the verb coming last to avoid unfavorable outcomes – so introduce subject first, unfold the sentence details, gauge the listeners response so far, then decide on the strength of the verb, and whether it should be positive or negative.}

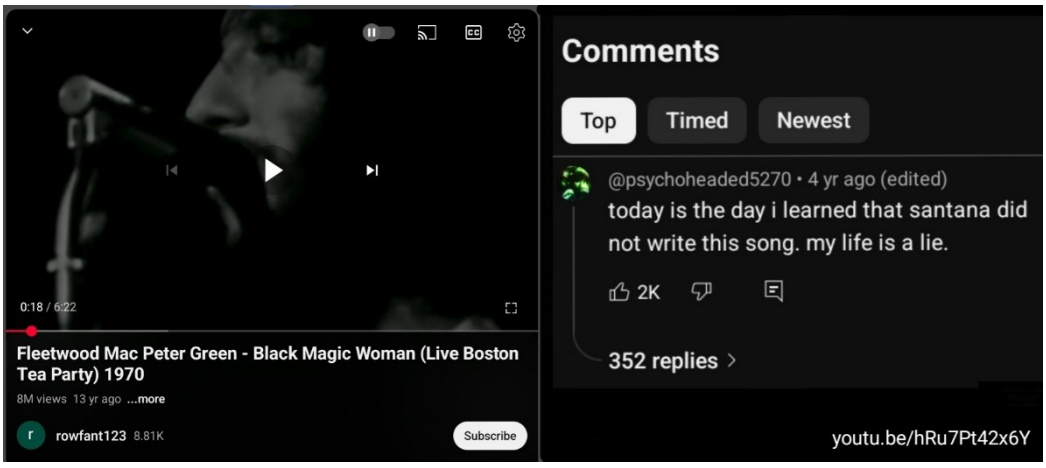
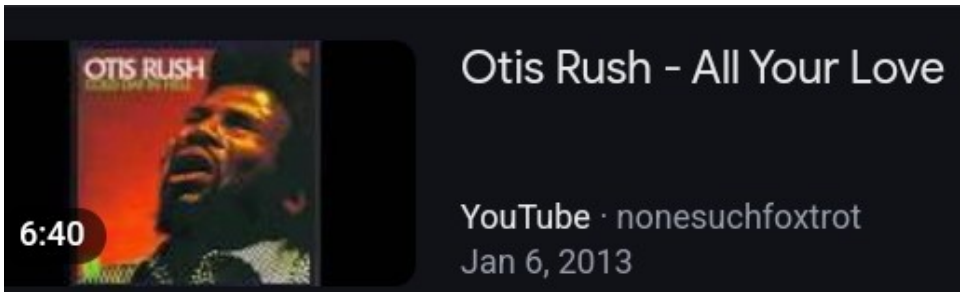
 Research uu

 {BMW (Y)| Trailer • (G) } In a contemporary plagiarism saga that aptly compares with Eden-Snake, everyone thinks Black Magic Woman is a Carlos Santana song, but he nicked it from Peter Green (29 Oct ‘1946 - 25 Jul ’2020), Fleetwood Mac founder – live at Boston Tea Party '1970 & studio version ’1968 {with Danny Kirwan ‘1950 - ‘2018 rhythm guitar (Jigsaw Puzzle Blues ‘1968 based on a clarinet piece, written by Joe Venuti & Adrian Rollini recorded by Joe Venuti / Eddie Lang Blue Five ’1933)} – Mick Fleetwood remembers Santana coming to see them play.
PG’s last performance with the band New York 27iii71 closed (to the annoyance of Bill Graham) with a 4-hour rendition of BMW
Hence, the apt YouTube first comment for the Green live version: “today is the day i learned that santana did not write this song. my life is a lie.”



But PG really only changed the lyrics of a song he plagiarized from Otis Rush (‘1934-’2018) All Your Love (‘1956).



PG became schizo paranoid giving away most of his money, but wasn't shamed enough (like CS eventually was) by contemporaries that knew about the BMW plagiarism into giving some to Otis Rush who prematurely stopped playing.
Every time CS plays BMW he should credit Otis Rush.
YouTube, Spotify et al should be corrected accordingly.
And the royalty system should be changed and redirected to the Estate / descendants of Otis Rush. Indeed, they should already be suing the Estates of PG & CS.

.

cf. Chuck Berry plagiarized a riff from guitarist Carl Hogan (‘1917 - ’1977) on Ain't That Just Like a Woman

> ‘1946 – opening lyrics:
> There was Adam, happy as a man could be
> 'Til Eve got him messin' with that ol' apple tree
> Ain't that just like a woman…

in the intro to Johnny B Goode (‘1958) a song that became a Rock & Roll classic.

• {NV} Another Early Dynastic Incantation (‘06) re MRAH O, 1920 – Niek Veldhuis, University of California, Berkeley
{As usual no ‘elephant in the room’ cuneiform or even a photo, just abc…xyz sludge, but we managed to find the subject tablet at CDLI P272783 – it's not in the same legible condition as our beautiful P010644
It's interesting that even Niek admits to guessing ‘gale’ for i.6. I.IGI.MAŠ

i 4. $^{im}u_5$ mu-zi — *south wind rose,*
5. ^{im}mir mu-zi — *north wind rose;*
6. I.IGI.MAŠ — *gale*

and for iii.8. igi-na mu-bar Niek just leaves it blank, when one would have at least guessed “(and the body of a man) with the face of an outsider”
 face front eye igi 12146
 outside split bar 12047

iii 7. su-bar lu_2 — *and the body of the man.*
8. igi-na mu-bar
9. ^{d}MA-gu_{10} — *My MA-god,*

(We can also empathize with a summation Niek once expounded, something to the effect, “When I view a cuneiform tablet I am in direct contact with people from 5,000 years ago” – the reason he literally digs his profession {we totally concur – it's like checking a text on your smartphone that's succinct, bit cryptic n 5 mins old, but in this case the text is 5 millennia}; lately Niek is heavily involved in developing ORACC-ePSD2 with Steve Tinney at upenn) }

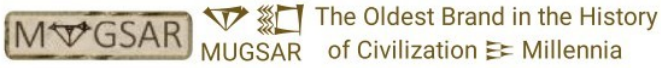
Epilogue

Plagiarism has been rampant for millennia, a little time and distance from the origin. Songs, text, festivals – esp if it's annual, like say the December solstice Sun god ritual. A year is a long time, it's easy to eventually change the name. But weekly – they couldn't take over the days of the week named after gods, Sun god being rightfully first, Sunday, Moon-day, Twi (OE war god) … head Old Norse god Woden's day, sky god Thor's day, Frigg (Woden's wife) …end god Saturn's day… Even the months, starting with the god who looks forward and back, Janus…

So, it's fascinating how you can grow up in a household / community and be indoctrinated with some plagiarized dogma, but the true etymology hangs in, they might order, "You must give me this by …'Wednesday'!" – *wooof* just like that, they just honored one of our throwback culture's gods.

Now of course there's the Internet, a little more difficult to keep the mushrooms in the dark and feed them on shit – us plebes can start weeding out the impostors and make our own connections.

A good place to dabble is Bob Englund’s CDLI, with the Mugsar QuickFinder open, of course.



.. □ ..
